

FÅRBO MEKANISKA AB

THIS IS WHERE IT HAPPENS!

# OUR VISION: THE BEST WORKSHOP IN SWEDEN BY 2025!

Roger Berggren, the super-entrepreneur who built the company from the ground up, founded Fårbo Mekaniska AB in 1988. He ran it until 2019, along with his brother Ronnie Berggren and the rest of the team. Roger then decided to enlist the assistance of others to assist with the journey ahead. The ownership circle has grown to include Henrik Saldner and Ari Kresti, the founders of Swedish Industrial Automation (SVIA), which has since been acquired by ABB, as well as Mikael Vetterkog, who has worked for ABB and Hexagon.

## A TEAM OF EXPERTS AND INNOVATORS

Through this combination of super-entrepreneurs and people with experience in a large company environment, we have created the right conditions to succeed in our boldly set goal. Our goal is to be Sweden's best workshop by 2025, with a revenue of SEK 500 million. Our dedicated and loyal employees, as well as our ability to focus on the task at hand, play a vital role. We do what we do best: we minimise risk and deliver exactly what our customers want.

## STATE-OF-THE-ART MACHINE FLEET

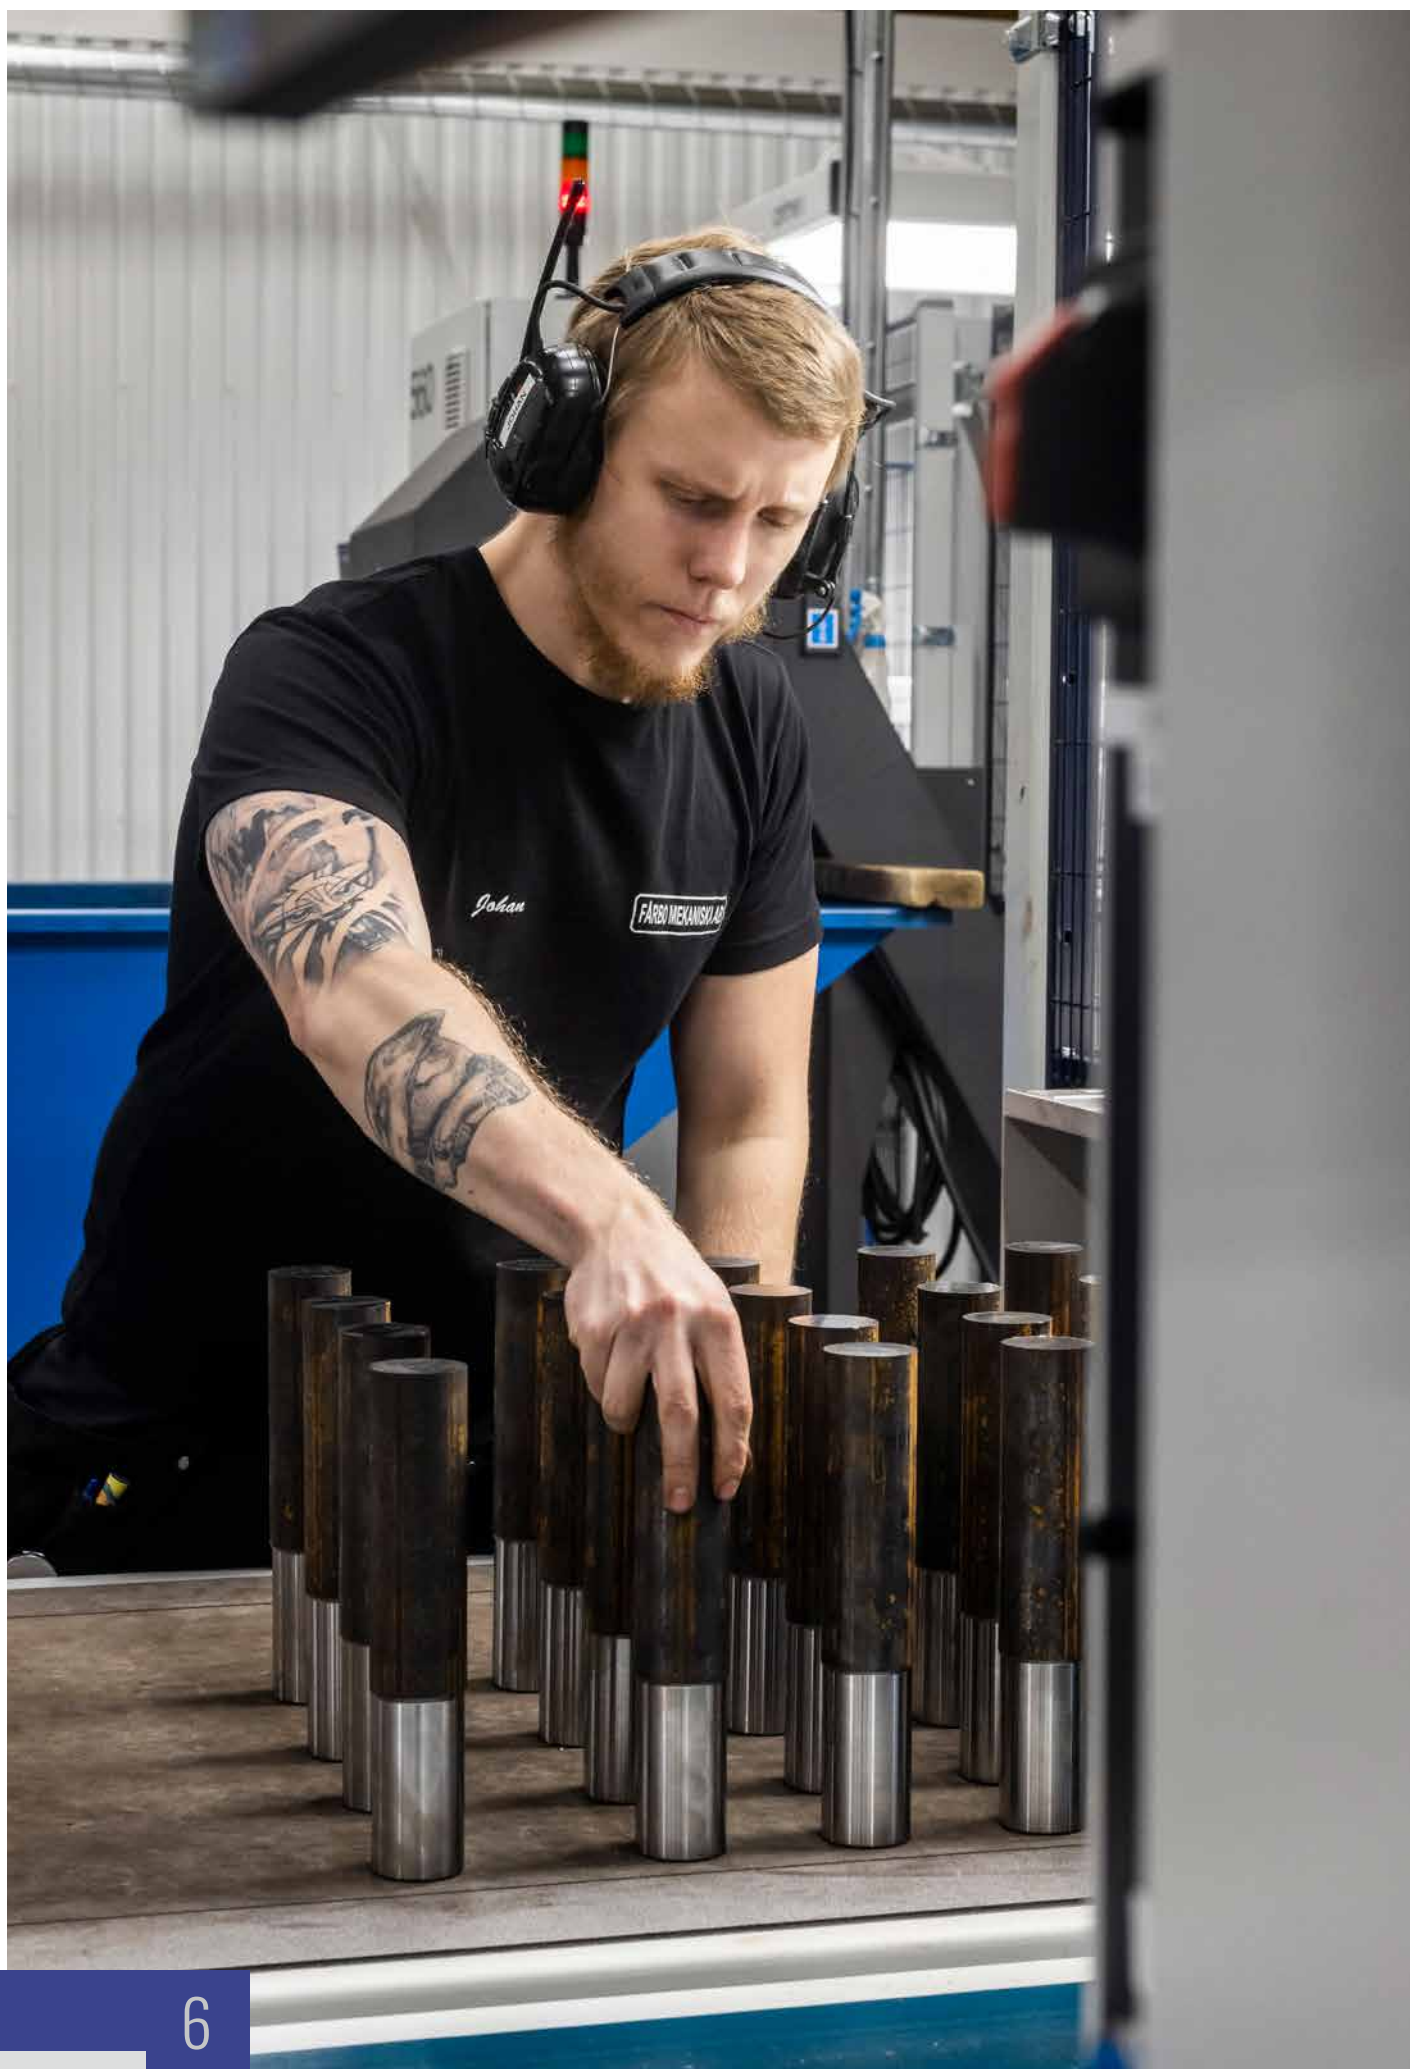

A modern machine fleet is an integral part of Fårbo's DNA. Our machine park, which presently has about 100 machines and automation equipment, is constantly growing. Together with our bright and devoted team, we have assembled a special mix of business expertise, robotic automation, tool development, and leadership experiences that puts us in a unique position to lead Fårbo toward new heights.

### LISTA ELECTRONIC CONTROL

maximum flexibility and security to manage valuable and important stored goods with inventory control

## 100 MACHINES AT YOUR SERVICE

- 23 2-axis lathes
- 11 Multitasking machines
- 5 5-axis machining centers
- 2 3-axis machining centers
- 1 Horizontal machining center
- 1 Manual lathe
- 3 Deep hole drilling machines
- 2 Shaft machining centers
- 3 hole EDMs
- 2 wire EDMs
- 1 5-axis laser machining center
- 3 Planers
- 1 Washing machines
- 1 4-axis Laser engraver
- 1 Eccentric press
- 2 Tumbling machines
- 1 CMM
- 2 Contour measure machines
- 1 Optical measuring machine for shafts
- 27 Automations
- 4 Bar feeders

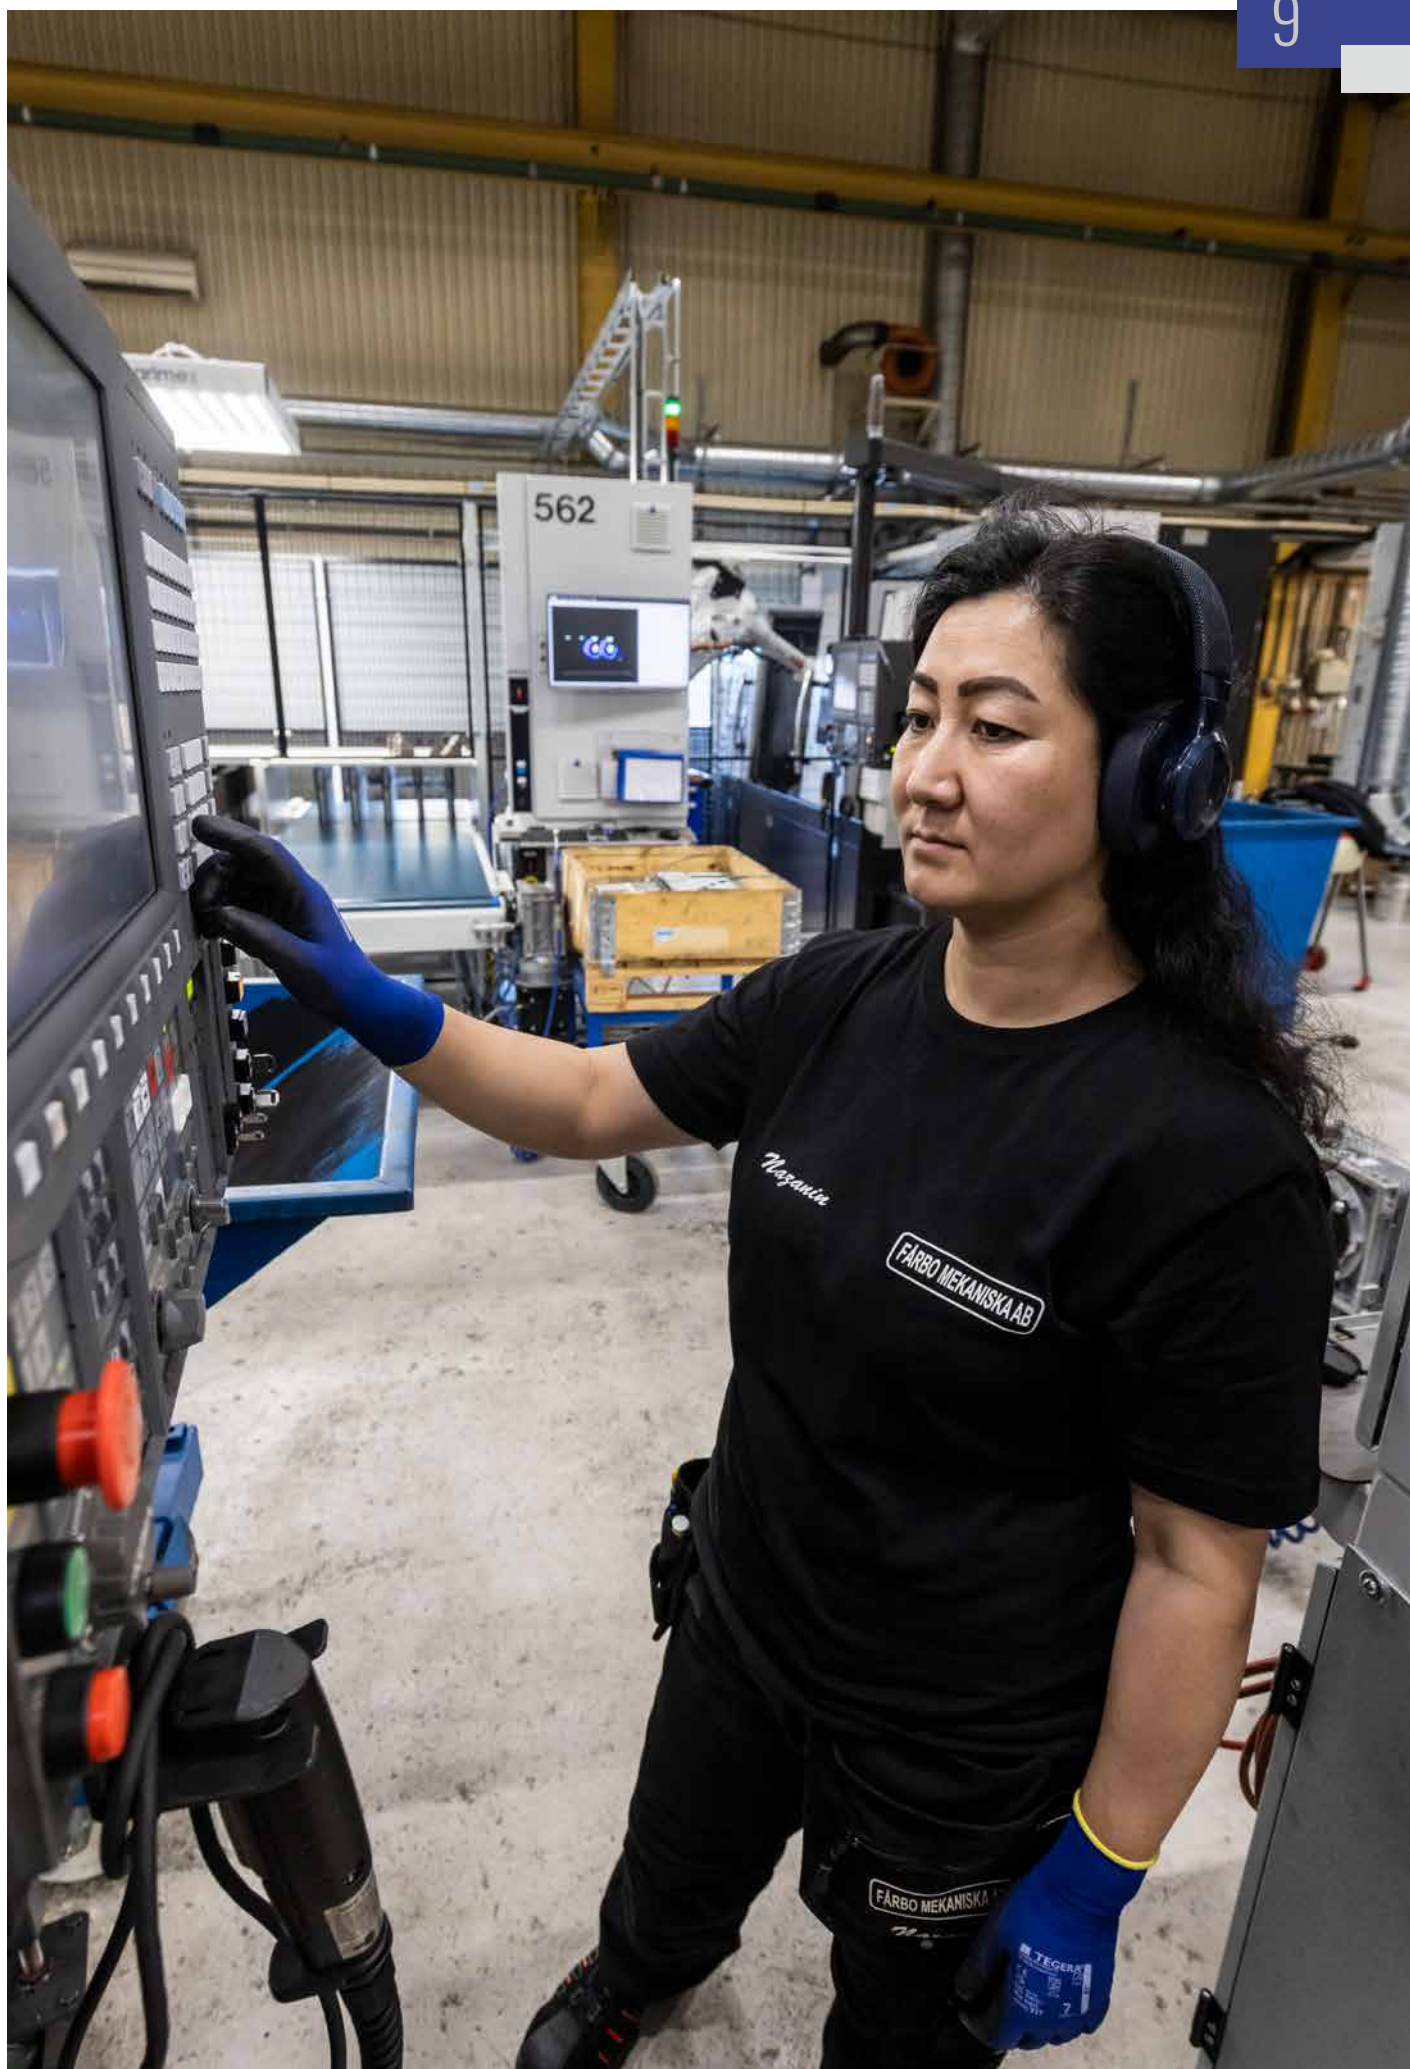

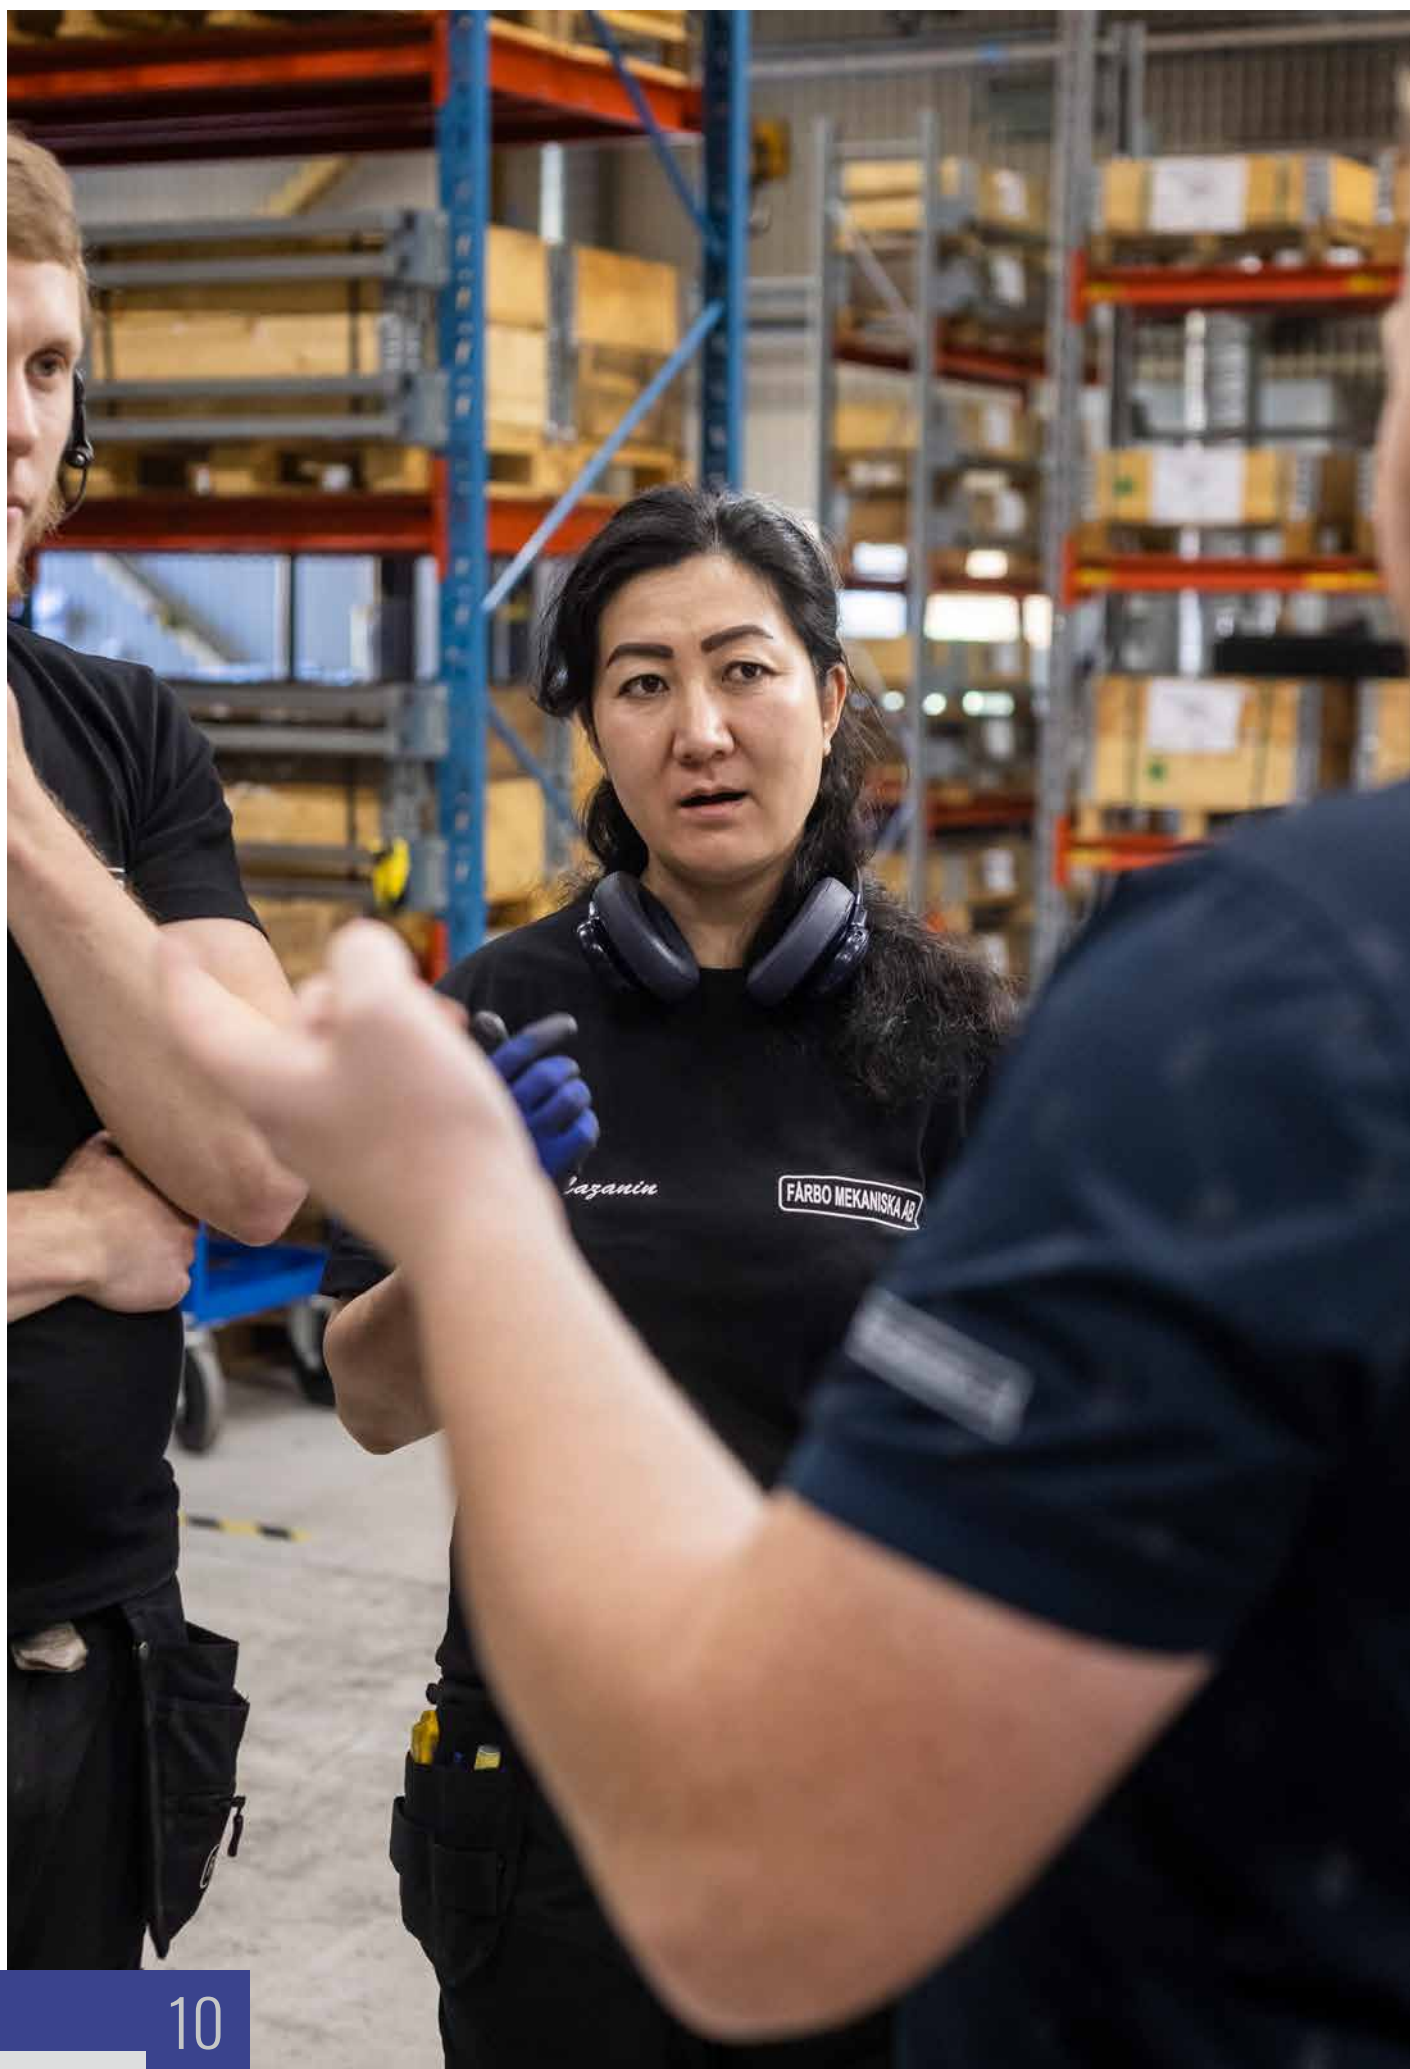

## TURNING

We have a large number of Okuma lathes, many of which are multifunction models that can produce highly complex parts. The majority of lathes have robotic automation. Our lathes' material dimensions are as follows: minimum diameter 10 mm, maximum diameter 630 mm. The maximum length is 2,100 mm.

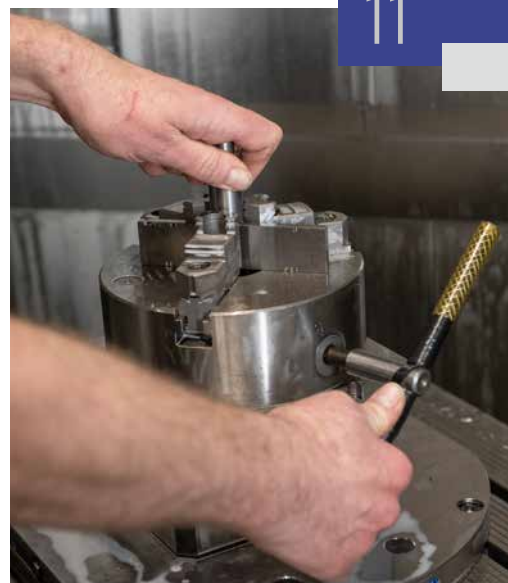

## MILLING

Our newly constructed milling department is home to a large number of 3-axis and 5-axis machines. Our 3-axis machines have a working area of 1,250 x 650 mm, and our 5-axis machines have an area of 800 x 800 mm.

SMW-Autoblok tillverkar uppspänningssystem för svarv-, slip- och fräsmaskiner. Vi utvecklar, tillverkar och sköter support för alla våra egna produkter, och sätter en standard för industrin världen runt.

## CONTRACT MANUFACTURING AND WAREHOUSING

Fårbo recently constructed a new factory for contract manufacturing and customer warehousing. We deliver from stock in three days with 100% accuracy. This type of contract is a strong offering to customers in our market, and we see a lot of room for growth here. We simply see this new business venture as a win-win situation for both ourselves and our customers. We at Fårbo have a consistent order intake, which allows us to more easily plan for investments in new equipment. Our customers benefit from lower net working capital and allowing us to do what we do best, allowing them to focus on their own strengths.

## WELCOME TO THE FÅRBO FAMILY!

We are in a very expansive phase at Fårbo, where we are growing every year. Despite this, our work environment is far from that of a typical large corporation; in fact, it is the polar opposite. Fårbo has a familiar, tolerant, and welcoming atmosphere. Here, we support and assist one another, and we believe in freedom with responsibility. Does that sound appealing to you? To thrive with us, we believe you are a forward-thinking individual who is motivated by growth. You are interested in new technology and learning new things. If that sounds like you, then we think you'd be ideal for us!

## ACTIVELY WORKING WITH SUSTAINABILITY AND THE ENVIRONMENT

At Fårbo, we strive to reduce as much of our carbon footprint as possible. Our overall goal is to reduce emissions by 30% by 2025, and we have already made significant progress. For example, by switching to geothermal heat, we saved 13 m3 of oil per year. The next step is to replace our vehicle fleet with zero-emission vehicles. When it comes to social sustainability, we prioritise providing a welcoming and healthy work environment. By 2025, our target is to have at least 30 % women in our team, and we also sponsor local sports to ensure a healthy and vibrant society. It goes without saying that we support the United Nations' global goals for sustainable development.

Vi är specialister på värmebehandling av alla förekommande verktyg och maskinkomponenter i olegerat eller legerat stål.
