

# Reliable Motion Solutions

## Support and expertise

# Your partner in engineering excellence

Looking to streamline your engineering process and deliver top-performing products? Partner with REAC for solutions that elevate your designs and simplify your workflow! By aligning with your engineering goals, we help you create market-leading, reliable, and innovative power wheelchairs. Efficiently and effectively.

### Seamless compatibility

Our solutions are built on modular designs and standardized interfaces, for effortless compatibility with industry standards. It will save you time and reduce costs, freeing up your engineering resources to focus on innovation.

### With you every step of the way

From concept to deployment, REAC has you covered. With detailed technical documentation, CAD models, and hands-on engineering support, we help you tackle challenges and ensure flawless integration for a faster, smoother development process.

### Exceptional is our normal

Our R&D team does more than meet expectations. We exceed them. Through rigorous testing and validation, we deliver safety, durability, and performance. Need something unique? We customize modules to solve complex design challenges, optimize functionality, and deliver value-driven results tailored to your needs.

### Let us drive innovation together!

REAC not only supports your team. We empower them. Reach out today to see how we can bring your vision to reality!

Ready to  
**innovate**  
with REAC?

## Put us to the test!

Contact us today to start a partnership for smarter design and superior outcomes. Together, we will turn complexity into innovation.

## Industry insight

# Your engineering challenges are our expertise

We understand the complexities you face. And we are here to simplify them. Invite REAC to join your design process as early as possible, to get maximum value for both your customers and yourself.

### Experienced problem-solvers

Do you need to achieve durability and ensure seamless system compatibility, or meet stringent quality standards? REAC will help you succeed. Decades of experience have given us a profound understanding of design constraints, performance optimization, and regulatory requirements.

### Always up to the challenge

- Stability and safety? We engineer solutions for reliable performance on all terrains.
- Regulatory compliance? We meet the standards that keep your designs market-ready.
- Lightweight durability? We strike the perfect balance for user comfort and product longevity.
- Essential testing protocols? Our rigorous validation ensures functionality and performance where it matters most.

## Confidential in-house production

# Your vision is safe with us

REAC's in-house production is not just about making products, it is about helping you succeed. We are flexible, responsive, discreet, and dedicated to your vision. Together, we will bring your ideas to life.

In our manufacturing facility, we have all the qualifications and hardware necessary to deliver the desired results. You will have direct control over the entire process.

### Reliable supply without surprises

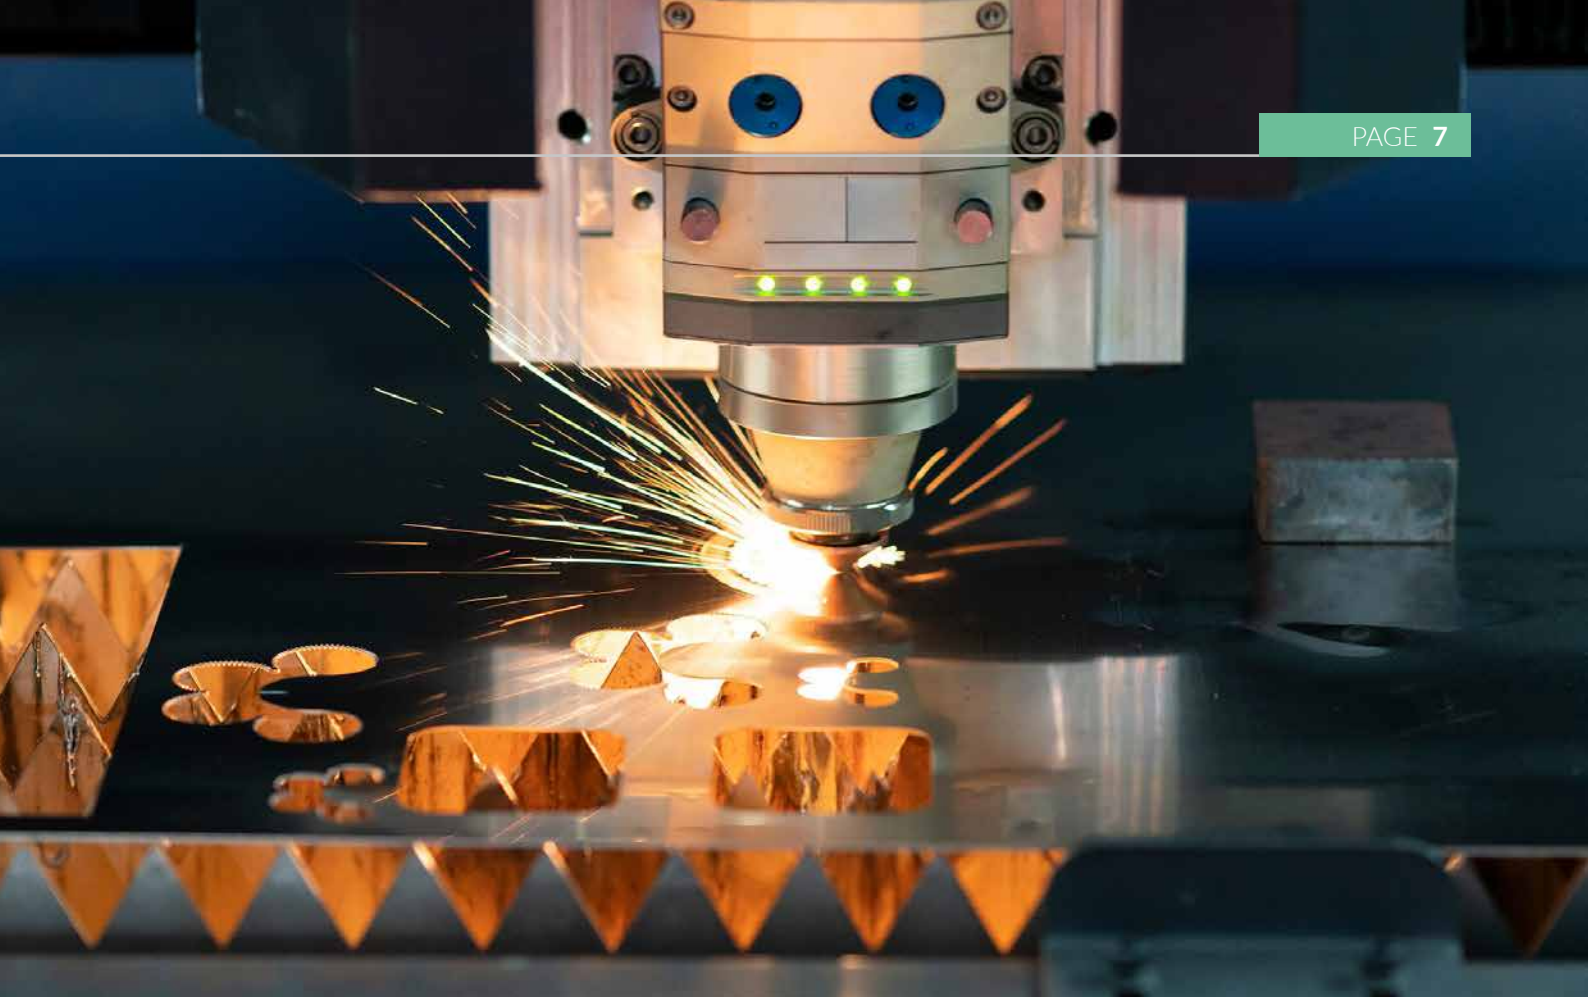

Thanks to our own components factory, costs, processes and quality are always under control. It also makes us more responsive. When unexpected changes occur, you will be pleased with our fast response times. When procuring components, we have an in-depth knowledge of the market that ensures precision and efficiency.

### Confidentiality guaranteed

It is an honor and a great responsibility to be involved in the development of your products. REAC offers absolute confidentiality and intellectual property protection. Our wide range of manufacturing services lets you minimize your number of suppliers, making it even easier to protect sensitive information.

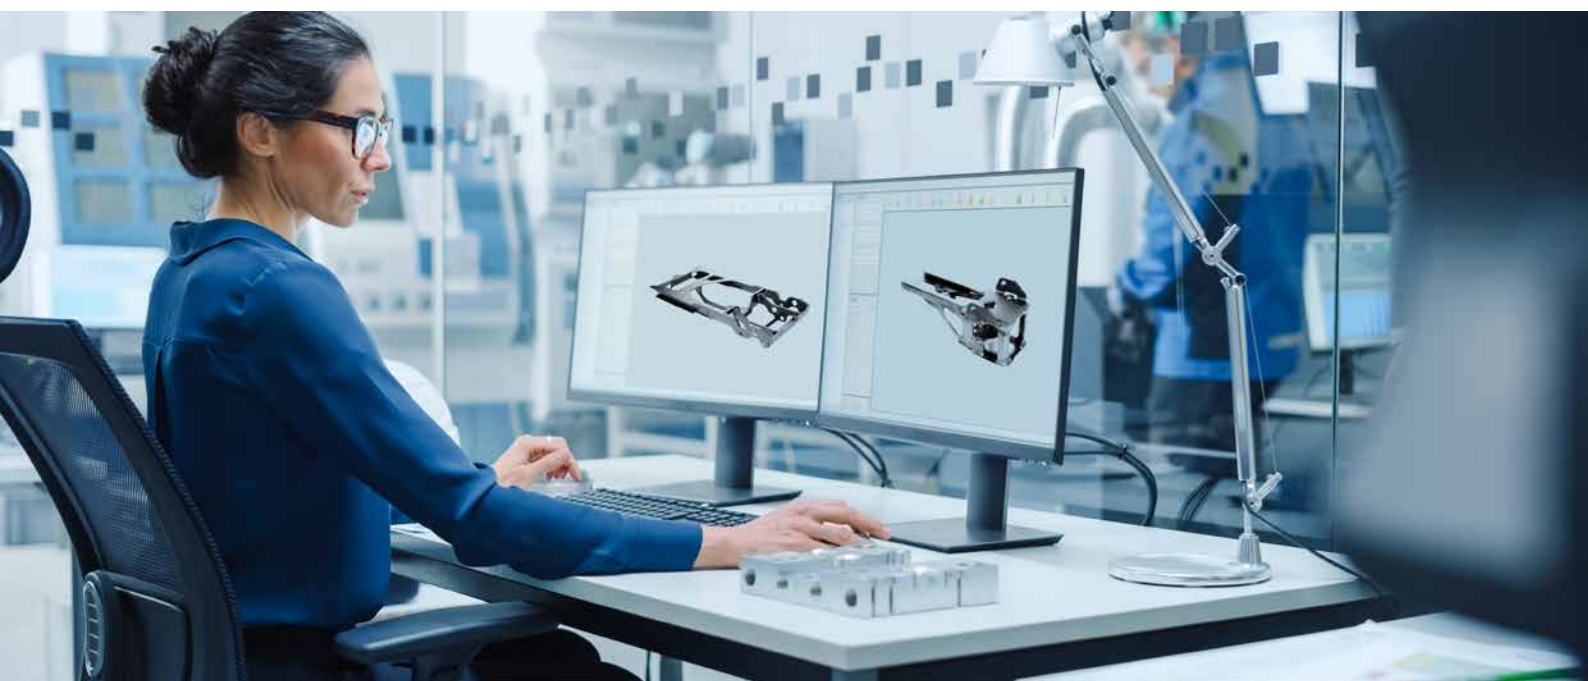

## Our factory is yours

Contact REAC today, to find out how we can put your vision into production.

## Testing and quality assurance

# Details that let you rise above the competition

In power wheelchairs, reliability and durability are not optional. They are essential. That is why rigorous testing and adherence to globally recognized standards are crucial parts of REAC's work process. Our attention to detail will set your products apart on a competitive market. Aligning with industry standards is not only a matter of safety. It enhances market readiness, inspires customer confidence, and helps your products excel in the most demanding environments. We take reliability in wheelchair design to the next level.

### Reduce warranty claims and costs

We conduct comprehensive tests to make sure your products deliver on durability, strength, and functionality. Our rigorous approach reduces the risk of breakdowns, minimizes warranty claims, and protects your bottom line, all while keeping your customers in good hands.

### Approved technology

By integrating our approved technology, you leverage a seating system that has already undergone rigorous qualification processes. Regulatory authorities know our products deliver proven performance and reliability, helping you dodge the risk of rejection, speed up approvals, and steer clear of costly delays when getting your new models to market.

## Global standard for success

By adhering to RESNA guidelines and ISO standards, we ensure that your wheelchairs match the highest benchmarks for safety and performance.

Our process is certified under MDR (ISO 13485).

It builds your credibility and prepares your products for success on the global markets.

Reach out today to learn how testing can elevate your brand!

# Expect us to exceed expectations

In REAC, you will have a reliable partner who understands your reality, as well as your potential. Trust us to protect and realize your vision. We will dedicate our engineering expertise to solving the challenges that stand in our way, while honing the details that give you a competitive edge.

## Why choose REAC?

Proven product designs, adaptable to various wheelchair manufacturer and user needs.

Faster time-to-market with expert guidance. Adapting existing constructions, rather than creating new ones from scratch, will shorten your design process as well as your time to market.

In-house manufacturing ensures reliable quality and supply.

Extensive, customer-tailored testing ensures reliable quality throughout the entire lifespan of our products.

## Together, we keep you moving forward!

Partner with us  
to build safer, smarter  
power wheelchairs!
