

**WOULD YOU LIKE
TO BE A PART OF
SOMETHING BIG?**

WENMEC

WE ARE WENMEC

WHEN WE GO TO WORK, we know we are part of something big! Wenmec is an engineering company with cutting-edge expertise in the manufacture of complete system deliveries, products and components for industries worldwide. In 2023 we celebrate the first 40 years of Wenmec alongside our more than 150 employees spread out across our production facilities in Kil and Laxå in Sweden and in Nanjing in China. All in all, Wenmec manages over 15,000 square meters of production space.

OUR EMPLOYEES are our greatest asset and we constantly strive to develop competence within the company through training and reinforcing good working conditions by offering a safe and secure workplace for our employees. Our strength as a company is that we see the person behind each deal and make every effort to meet your wishes. This approach also ensures consistent quality and follow-up for each project.

WENMEC IN LAXÅ

WENMEC IN LAXÅ is a subsidiary of Wenmec AB in Kil. We are specialists in the manufacture of advanced products in the form of turning, milling and grinding of details in steel, aluminium, stainless steel, copper and brass. We work with world-leading customers both in Sweden and globally. In addition to our specialty in batch production, we take care of everything from logistics and material procurement to surface treatment, prototype manufacturing and even minor assembly, all precisely according to the customer's wishes.

WENMEC IN NANJING, CHINA

THROUGH WENMEC MACHINERY, our subsidiary in Nanjing, China, we provide support to our global customers. There is interest in the market for manufacture in China and subsequent import back to Sweden. This generates several competitive advantages for our customers, as they will be able to get the best of both worlds.

With the Chinese company as a platform for purchasing and production, the Wenmec group has a prime opportunity to service global customers locally in Asia, an ever-growing market.

Bredd och spets under samma tak inom skärande bearbetning

Vi är experter på legotillverkning av frästa och svarvade detaljer där vi är med under hela resan, från prototypstadiet till serieleverans. Vi har också kompetensen och resurserna att tillverka såväl enstycksprodukter som stora serier, alltid med kvaliteten i centrum. För oss på Ebbemåla Mekaniska Verkstad går vägen till ett lyckat slutresultat genom samarbetet med våra kunder.

Vi har nära och långa kundrelationer, byggda på korta beslutsvägar och god kommunikation. Med vår genuina historia i ryggen tar vi oss an framtiden, där vi strävar efter att hela tiden utvecklas. Idag satsar vi mycket på digitalisering och vi investerar kontinuerligt i nya maskiner.

YOUR EXPERT SUPPLIER OF COMPLETE SYSTEMS

WE ARE AT OUR BEST when we can take care of everything from A to Z. At Wenmec, this includes a complete system with welding, processing, assembly and the procurement of accessories. Thanks to our ability to keep large stocks, we always have products on hand and can customize a product that contains as many components as required to get it exactly as the customer wants. Through our spacious assembly premises with ample overhead crane capacity, our competent employees and our modern machinery, we can all but assure you that we will meet your specific needs. We possess the knowledge and competence needed to deliver complete systems of the very highest quality.

WELDING

We perform welding in most materials, from low-alloy to high-strength steels in both black and white materials. We have extensive welding expertise and are certified according to ISO 3834-2. This applies to MIG/MAG, TIG, MMA, as well as powder welding. Our experienced welders have all the necessary welding licenses and are certified according to ISO 9606-1 and WPQR in the groups 1, 3, 8 and 10. Our robot operators are certified according to ISO 14732.

PROCESSING

Wenmec performs machining in the form of turning, milling and carousel turning with great demands to precision. We process many different types of objects, from the smallest to the very large, and we perform 5-axis machining in both lathes and milling machines. This is possible thanks to our extensive and modern machinery and our employees' high level of skills. We have several machines for milling and turning, and our carousel lathe can handle objects with a diameter of up to 2.5 metres. We also have arbor mills that can handle workpieces up to 25 tons. This extent of machinery and our ability to handle larger products than most makes our position in the market unique.

ASSEMBLY

We carry out complex mechanical assembly, electrical assembly, automation and hydraulic assembly in batches and as one-piece objects, as well as prototype assembly. Our experienced and competent fitters handle all types of advanced assembly. In close collaboration with our customers, we adapt and optimize the assembly according to need, size and quantity.

A RESPONSIBLE COMPANY

WE STRIVE TO DEVELOP at all times, which is why our work is defined by constant improvements from top to bottom. For many years, we have been implementing work methods and routines that allow us to ensure good quality, high efficiency with few annulments and a better environmental impact. Environmental awareness is great throughout the organization, and we share in caring about people's health. With this in mind, we have integrated a couple important UN Agenda 2030 global sustainability goals that we focus on in our day-to-day work.

AS A PART OF THIS, we have made some changes to further protect the environment. We have reduced our paper use, we illuminate the facility with LED lighting, buy green electricity and only use electric trucks. Wenmec has environmental and quality certifications in accordance with ISO 14001 and 9001.

OUR EMPLOYEES are our greatest asset and their well-being our top priority. We work actively with well-being in the workplace and review our working environment to make it optimal for our employees. At Wenmec, all employees must be able to express themselves and affect their own workday. We also actively promote diversity at the workplace, which in turn leads to increased well-being, commitment and efficiency.
